Filed : March 8, 2004

AMENDMENTS TO THE CLAIMS

Please amend the claims as set forth in the following listing of claims, which replaces all prior versions and listings of the claims.

- 1-42. (Canceled)
43. (Currently Amended) A supply unit for a soap dispenser, comprising:
a box defining an interior space sized and shaped to receive a supply of liquid soap, a first forward side of said box including a section defined by a perforated score line configured to define an aperture when said section is detached from said box, said aperture configured to permit said supply of liquid soap to be dispensed from said box, an external surface of a second rearward side of said box defining a recess configured to receive and securely support a battery outside of said interior space; and
a bag containing a supply of soap placed within said interior space of said box.
44. (Previously Presented) The supply unit of Claim 43, wherein said box has an open upper end, additionally comprising a plate sized and shaped to cover said open upper end.
45. (Previously Presented) The supply unit of Claim 44, wherein said plate extends over said recess.
46. (Previously Presented) The supply unit of Claim 45, wherein said recess extends an entire width of said box.
47. (Previously Presented) The supply unit of Claim 43, additionally comprising a battery received within said recess.
48. (New) The supply unit of Claim 44, wherein at least terminal ends of said battery are externally accessible when said plate is positioned to cover said open upper end of said box.
